William Calda

Power Apps Developer

williamncalda@gmail.com | williamcalda.is-a.dev | +63 948 730 4413

Versatile IT professional specializing in Power Platform development, web technologies, and automation. Skilled in building user-friendly applications using Power Apps, Power Automate. Experienced with Azure Integration, APIs, and AI to streamline workflows and boost efficiency.

Technical Skills

Power Platform, Power Apps, Power Automate, Sharepoint, AI Model Development and Integration, Azure, API Integration, NextJS, TypeScript, C#, C/C++, Java

Work Experience

Power Apps Developer — ATOMIT Business Solution, Inc.
March 2025 – Present

Key responsibilities & achievements:

- Designed and developed low-code business applications using **Power Apps**, streamlining internal workflows and improving data accessibility.

- Created complex automated workflows using **Power Automate**, integrating internal systems and enhancing operational efficiency.

- Deployed and managed **Power Platform solutions** using deployment pipelines for version control, **ALM**, and **environment management**, adhering to the **SDLC process**.

- Integrated Power Apps and Power Automate with **third-party APIs**, **Microsoft Graph**, and external services to extend functionality and streamline cross-platform processes.

- Managed and administered **SharePoint sites** as backend storage for **Power Platform solutions**, optimizing list design, permissions, and collaboration workflows.

- Utilized **Azure** services, including Azure Logic Apps, **API Management**, and Azure Functions, to enhance scalability and maintainability of Power Platform applications.

- Implemented and maintained **API integrations**, ensuring secure and efficient communication between business systems.

- Integrated **AI models** into Power Apps and Power Automate solutions, enabling intelligent automation and predictive features.

IT Staff II (Software Developer) — RYS Property Holdings, Inc.
December 2022 – March 2025

Key responsibilities & achievements:

- Developed and deployed low-code business applications using **Power Apps** and **Power Automate** to automate internal operations across multiple companies.

- Designed **SQL** databases and integrated them with **Dataverse** to enable seamless data synchronization and reporting within the Power Platform ecosystem.

- Built and implemented **C# scripts** to extend app functionality and support business-specific logic.

- Integrated **ZKTeco biometric systems** directly with **Power Apps** for automated attendance tracking and employee validation.Developed several in-house systems such as Leave Management, Official Business Trip, and Approval Systems, improving workflow efficiency and transparency.

- Managed and administered **SharePoint sites** as backend storage for **Power Platform solutions**, optimizing list structures, permissions, and collaboration workflows.

- Oversaw internal networks, servers, and Microsoft 365 environments as a system administrator, ensuring secure and reliable IT operations.

- Partnered with business units to analyze requirements, deliver **scalable solutions**, and continuously improve digital processes.

Education

BS in Information Technology

Colegio De Montalban - Rodriguez, Rizal

* *Awarded as One of the Programmers of the Year*
